Chandigarh, India - 160030

SUMMARY

Creative and detail-oriented UI/UX Designer with a strong foundation in user-centered design, wireframing, prototyping, and visual design. Passionate about solving real-world problems through intuitive digital experiences using design thinking. Skilled in Figma, Adobe Photoshop, and Adobe Illustrator, with hands-on experience creating responsive interfaces, design systems, and case studies. Eager to contribute creativity, collaborate with teams, and continuously grow while building impactful products.

EXPERIENCE

Graphic & UI/UX Designer Freelance — Kailshians Web Services

On-site · Jan 2026 – Jul 2026

- Designed website interfaces using Figma, focusing on usability and visual hierarchy
- Created social media creatives, promotional graphics, and digital design assets
- Developed UI layouts with consistent typography, spacing, and visual design
- Collaborated with the team on design requirements, feedback, and project iterations

Media Team Member — E-Cell Department

Chandigarh Group of Colleges, Landran

- Responsible for graphic design and visual communication for college events
- Supported outreach initiatives through consistent visual branding

UX Design Job Simulation — Lloyds Banking Group (Forage)

Remote · Apr 2026

- Completed Introduction and Advanced job simulations covering the end-to-end UX process
- Conducted competitive analysis, customer research, and user survey design
- Researched customer spending habits and developed a customer value proposition
- Designed and presented the value proposition to a simulated stakeholder audience

PROJECTS

mParivahan – Mobile App Redesign (UI/UX Case Study)

Personal Project

- Redesigned the mParivahan mobile app to simplify access to vehicle and driving-document services.
- Conducted user research and review analysis to identify pain points around authentication, navigation, document access, and usability.
- Developed information architecture, user flows, wireframes, and high-fidelity screens to improve the overall user experience.
- Created a consistent design system with reusable components, typography, color palette, and accessible UI patterns.
- Refined key user journeys including RC/DL access, vehicle information, challans, and document-related services through iterative design.

Motiv — Smart Task Management App (UI/UX Case Study)

Personal Project

- Designed a task management mobile app from concept to high-fidelity prototype using the Design Thinking process.
- Conducted user research, created personas, user stories, and identified pain points to guide design decisions.
- Developed information architecture, user flows, wireframes, and interactive prototypes in Figma.
- Built a responsive design system with reusable components, typography, color palette, and accessible UI.
- Refined the design through competitive analysis and usability-focused iterations.
